

# Dog walkers please take care

In the last five years there were 186 incidents involving people with dogs on level crossings. So please take care and keep your dog on a lead.

**It's easy to get distracted,** especially when your dog is off its lead. **Even if your dog is fully trained keep it on a short lead when crossing to remove distractions and keep your dog safe.**

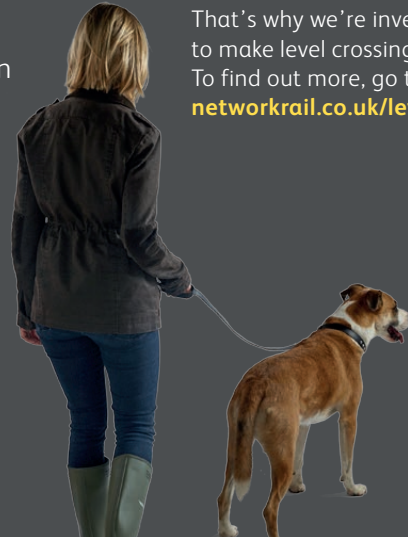

**Don't assume** there is only one train or use previous experience to guess when the train is coming. Trains can come from either direction at any time. **Check both ways before crossing – if there is a train coming, don't cross.**

**Stop, look, listen.** Follow signs and instructions. **Cross quickly when clear and keep your dog on a short lead.**

Network Rail cares about your safety. That's why we're investing £100 million to make level crossings safer. To find out more, go to [networkrail.co.uk/levelcrossings](https://www.networkrail.co.uk/levelcrossings)
